Implementing Structured Teaching In A Classroom to Improve Student Outcome

Presented By:
Karine Gleason karineg@tasnatbs.org
Peggy VonFeldt peggyv@tasnatbs.org

TASN Autism and Tertiary Behavior Supports is funded through Part B funds administered by the Kansas State Department of Education's Special Education Services. TASN Autism and Tertiary Behavior Supports does not discriminate on the basis of race, color, national origin, sex, disability, or age in its programs and activities. The following person has been designated to handle inquiries regarding the non-discrimination policies: Deputy Director, Keystone Learning Services, 500 E. Sunflower, Olathe, KS 66070, 785-876-2214

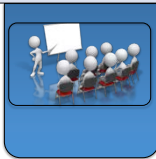

Objectives

As a result of this presentation, participants will...

- increase their knowledge about the characteristics of Autism
- review the components of Structured Teaching
- learn and practice a systematic process to help implement the components of Structured Teaching in a classroom setting

Autism and Tertiary Behavior Supports
www.ksdetasn.org

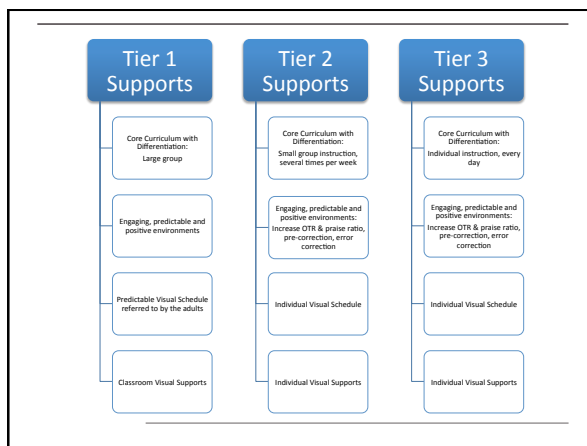

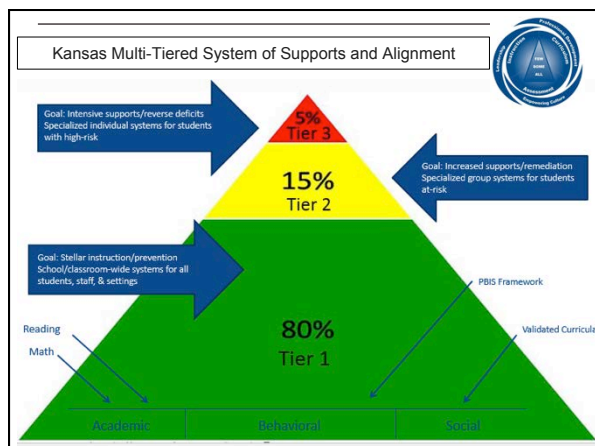

Introductions

Karine and Peggy	TASN ATBS	Who's in the audience?
		

Autism and Tertiary Behavior Supports
www.ksdetasn.org

School-wide Positive Behavior Programs (MTSS, CHAMPS, re-design schools, etc.)

What is autism?

Autism spectrum disorder (ASD) is a neurodevelopmental disorder characterized by challenges in social interactions, social communication and by restricted, repetitive patterns of behavior.

National Autism Center

Characteristics of Autism

Communication	Sensory Processing Cognition Motor Skills Emotional vulnerability Medical and other biological factors
Social Interactions	
Patterns of Behavior	

Differences in Thinking

Write the following words in alphabetical order (the order they come in the alphabet).

~~X~~ pumpkin log river fox pond

1. alpp
 2. knrtppd
 3. pb
 4. clrv
 5. fox
 6. chp

Differences in Learning

Differences in Neurobehavioral Patterns

There is no one intervention that is effective with all children with autism spectrum disorders.

National Standards Project-Phase 2
<http://www.nationalautismcenter.org/national-standards-project/phase-2/>

Structured Teaching

Definition, goals & elements

Structured Teaching

...is a visually based approach to creating highly structured environments that support individuals with autism in a variety of educational, community, and home/living settings (Mesibov, Shea, & Schopler, 2005)

Using components of Structured Teaching can benefit many individuals.

"Many of the characteristics observed in ASD are also seen in other developmental disabilities and psychiatric conditions. What separates ASD from other disabilities are the number, severity, combination, and interactions of characteristics" (Mesibov, Shea, Schopler, 2005).

TASN
Autism and Sensory Behavior Supports
www.tasnsupport.org

Goals for Structured Teaching

- Provides meaning and understanding within the environment.
- Provides feelings of calm and comfort.
- Makes learning possible by eliminating unnecessary stimuli, focusing attention on relevant information.
- Provides visual systems and supports so student can learn and then generalize skills and appropriate behaviors.
- Promotes independence.

(Mesibov & Shea, 2008); <http://www.teacch.com/whatis.html>

Elements of Structured Teaching

TASN
Autism and Sensory Behavior Supports
www.tasnsupport.org

Physical Structure

...using visual supports such as furniture, labels, icons, etc., to create visual boundaries that make environments comprehensible and manageable.

Alanna Harryman, Derby

Rationale for Physical Structure

Physical structure is used to:

- Promote independence
- Segment the environment into meaningful parts
- Add contextual cues to provide an idea of expectations in that area
- Segment the environment into meaningful parts
- Provide clear visual and physical boundaries to help student understanding of where he is supposed to go
- Reduce stimulation and minimize visual and auditory distractions (TEACCH, 2016).

Components of Physical Structure

Classrooms are organized into well-defined instructional areas which are developed based on each classroom's unique curriculum (TEACCH, 2016). Each area should be visually organized and have a specific purpose and set of expectations.

- Learning areas
- Transition areas
- Sensory areas
- Organizational areas

Learning Areas

Used to meet the needs of the student and to maximize his/her learning by providing access to the curriculum

- Direct instruction
- Small group
- Large group
- Independent work
- Centers or work zones

Transition Areas

- Location of the students' schedules
- Location where students wait for new information

Alanna Harryman, Derby

Sensory Areas

- Provides a place where students can go to relax or regulate their emotions
- Includes sensory items individualized for each student (fidgets, music, items with visual effects, etc.)
- Time in the sensory area should be voluntary and used to prevent problem behaviors
- Not to be used as a time-out area

Organizational Areas

- Students keep personal belongings
- Staff keep personal belongings and/or confidential documents
- Storage for instructional materials
- Work surface/area for staff

Alanna Harryman, Derby

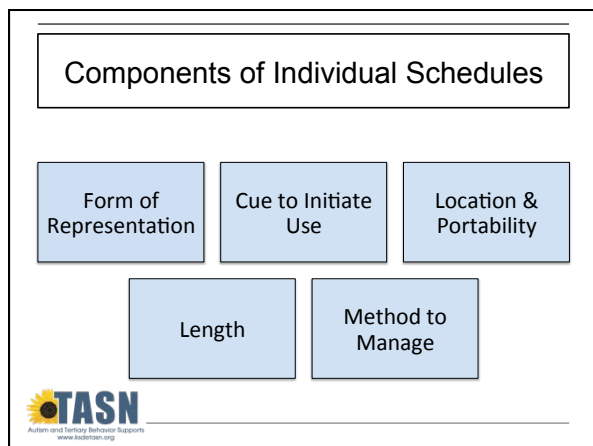

Individual Visual Schedules

...a visual/concrete method used to tell a person which activities will make up their day and the order in which they will occur.

Rationale for Individual Schedules

- Teaches flexibility and routines
 - Capitalizes on the the visual processing strengths of most individuals with ASD
 - Aids in transitions
 - Provides predictability
 - Teaches concept of first/then and finished
 - Decreases student anxiety
 - Promotes independence
- (Davies, 2008)

Work Systems

...are systematic and organized presentation of tasks and materials used to provide opportunities to practice previously taught skills, concepts, or activities (Schopler, Mesibov, & Hearsey, 1995).

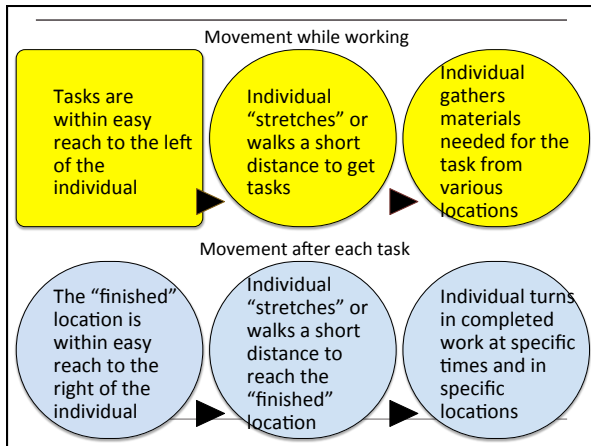

Alanna Harryman, Derby

- ### Rationale for Work Systems
- Focus on important details
 - Maintains attention to tasks
 - Reduces anxiety by providing predictability
 - Generalizes skills to new settings
 - Promotes independence

Components of Work Systems

- What work?
- How much work?
- When is the work finished?
- What comes next?

Visual Structure

...incorporating visual cues into a task or activity.

Rationale for Visual Structure

- Promotes use of visual strengths
- Increases meaning and understanding of activities and tasks
- Increases attention and engagement
- Allows for incorporation of student interests and motivation
- Decreases reliance on prompts
- Increases independence

(Mesibov, Shea, & Schopler, 2004)

When we present information verbally, the words are available for a brief moment.

When we present information visually, it can be there for as long as the student needs it.

Components of Visual Structure

- Visual instruction
- Visual organization
- Visual clarity

Routines

...strategies for understanding and predicting the order of events

- Involve breaking large amounts of work or activities into smaller, more manageable parts. These parts are chained or link together
- Routines detail the steps required for carrying out certain actions.

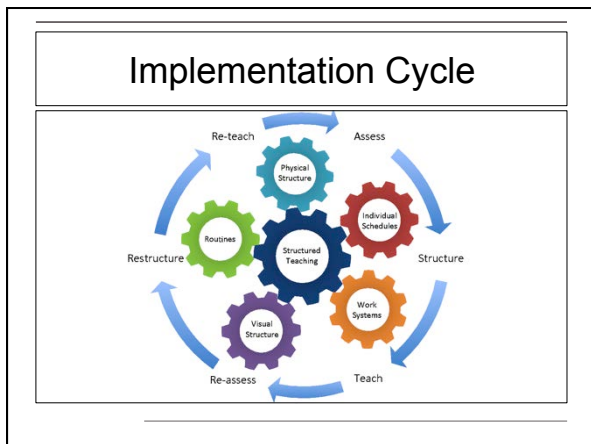

Rationale for Routines

- Address difficulties with distractibility
- Support challenges with time management and sequencing
- Helps maintain consistency in instruction across instructors
- Teaches meaning in an environment
- Increases independence
- Without explicitly taught routines, individuals with autism may develop their own- which may not be adaptive or effective (Mesibov, Shea, & Schopler, 2005).

Routines

- Established by the teacher
- Taught the first day of school

- Classroom
- Home
- Community
- Job site
- School activities
- Communication

Structured Teaching Planning Guide

Structured Teaching Planning Guide Workbook

Assess: characteristics and skills

- Watch video
- Identify characteristics and skills on the Student Summary Worksheet
- Share with shoulder partner
- Share with large group

TASN Student Summary Worksheet

Name: _____ Date Reviewed: _____

Student: _____

Student Information	Basic Concept strength and emerging skills	Physical Structure	Schedules	Work Systems	Tasks	Visuals
Observations/Characteristics: 1. Delay or absence of verbal language from the student communication? What supports are needed? 2. Communication non-reciprocity 3. Prone to tantrums 4. Limited social interaction 5. Difficulty expressing thoughts, feelings, needs etc. 6. Impaired conversational skills Needs/Interventions: 7. Visual communication 8. Difficulties with self-regulation						
Patterns of Behavior: 1. Stereotyped thinking, learning, doing, etc. 2. Hyper-focus on interests 3. Preoccupation with details or parts of objects or activities 4. Hyper-focus on activities, non-tasks, interactions etc.

Structure: create an individual visual schedule

- Using the information from the Student Summary Worksheet, complete the schedule planning form
- Share with shoulder partner
- Share with large group

Structured Teaching Planning Form

Individual Schedule Plan

Key Questions	Describe in detail	Restrictions
<p>What is the form of the visual cue?</p> <input type="checkbox"/> Object (photograph or representation)		
<input type="checkbox"/> T-2, A-1		
<input type="checkbox"/> Photo		
<input type="checkbox"/> Hand-drawn drawing		
<input type="checkbox"/> Written word, phrase, sentence		
<input type="checkbox"/> Combination		
<p>How much of the schedule will be displayed (length of the schedule)?</p> <input type="checkbox"/> 1 item at a time		
<input type="checkbox"/> 2-4 items at a time		
<input type="checkbox"/> Full day		
<p>In what area will the schedule be presented?</p> <input type="checkbox"/> Left side of wall		
<input type="checkbox"/> Right side of wall		
<input type="checkbox"/> Top of wall		
<p>How will the student manipulate the schedule?</p> <input type="checkbox"/> Carry object to location		
<input type="checkbox"/> Carry visual cue to match at location		
<input type="checkbox"/> Turn over or flip visual cue on schedule as completed		
<input type="checkbox"/> Add or check off visual cue on schedule as completed		
<p>Where will the schedule be located?</p> <input type="checkbox"/> Staff presents student with schedule info. (object, photo, etc.)		
<input type="checkbox"/> Schedule is posted in transition area		
<input type="checkbox"/> Schedule is checked & posted by student		
<p>How will the cue be presented to the student?</p> <input type="checkbox"/> Staff brings schedule info to the student (object, photo, etc.)		
<input type="checkbox"/> Student moves to posted schedule when given a visual transition cue (color-coded name card, etc.)		
<input type="checkbox"/> Student is alerted by staff to obtain portable schedule and check it		
<p>How will the student transition to the next activity?</p> <input type="checkbox"/> Student carries object given to him/her by staff and puts it in a envelope or bin at the location		

TASN
Autism and Tertiary Behavior Supports
www.tasnm.org

Teach: create a plan to teach the individual visual schedule

- Complete the questions on the Teaching Planning form
- Share with shoulder partner
- Share with large group

Structured Teaching Planning Form

Questions to Consider	Teaching Plan
Description/Script	Restrictions
How will the student be transitioned?	
How will you give the student's response?	
Where will teacher stand?	
How will you give the student feedback?	
How long will you wait for student to respond?	
What will you do if student does not respond?	
How will you correct the student?	
How will you reinforce correct response?	

TASN
Autism and Tertiary Behavior Supports

Data Collection Questions

- What data?
- How much data?
- When am I finished?
- What comes next?

Schedule Data Sheet

Student: _____ Transition from _____ to _____

Week of: _____ Transition Cue: _____

Yes = Once the check schedule cue is given, no further prompting took place. (Prompting includes: verbal, gestural, physical)

No = Once the check schedule cue is given, a prompt is required for completion of the step. (Prompting includes: verbal, gestural, physical)

Skill	Set Criteria for Mastery					Next Steps for Restructuring & Generalization
	Mon	Tues	Wed	Thurs	Fri	
1. Responds to check schedule cue	Yes	Yes	Yes	Yes	Yes	Skill 1 - Independent for _____ consecutive days
2. Responds to check schedule cue when schedule is in transition area	Yes	Yes	Yes	Yes	Yes	Skill 2 - Independent for _____ consecutive days
3. Knows which schedule cue to use when given a choice	Yes	Yes	Yes	Yes	Yes	Skill 3 - Independent for _____ consecutive days
4. Transitions to next activity when given a visual transition cue	Yes	Yes	Yes	Yes	Yes	Skill 4 - Independent for _____ consecutive days
5. Carries object given to him/her by staff and puts it in a envelope or bin at the location	Yes	Yes	Yes	Yes	Yes	Skill 5 - Independent for _____ consecutive days

See "Strategies for Restructuring" Form for considerations on moving forward.

Re-assess:

- Watch the video and complete the data sheet
- Share with shoulder partner
- Share with large group

Schedule Data Sheet

Student: _____ Transition from _____ to _____

Week of: _____ Transition Cue: _____

Yes = Once the check schedule cue is given, no further prompting took place. (Prompting includes: verbal, gestural, physical)

No = Once the check schedule cue is given, a prompt is required for completion of the step. (Prompting includes: verbal, gestural, physical)

Skill	Set Criteria for Mastery					Next Steps for Restructuring & Generalization
	Mon	Tues	Wed	Thurs	Fri	
1. Responds to check schedule cue	Yes	Yes	Yes	Yes	Yes	Skill 1 - Independent for _____ consecutive days
2. Responds to check schedule cue when schedule is in transition area	Yes	Yes	Yes	Yes	Yes	Skill 2 - Independent for _____ consecutive days
3. Knows which schedule cue to use when given a choice	Yes	Yes	Yes	Yes	Yes	Skill 3 - Independent for _____ consecutive days
4. Transitions to next activity when given a visual transition cue	Yes	Yes	Yes	Yes	Yes	Skill 4 - Independent for _____ consecutive days
5. Carries object given to him/her by staff and puts it in a envelope or bin at the location	Yes	Yes	Yes	Yes	Yes	Skill 5 - Independent for _____ consecutive days

See "Strategies for Restructuring" Form for considerations on moving forward.

Restructure:

- Review the Strategies for Restructuring and identify ways to restructure or expand
- Share with shoulder partner
- Share with large group

Strategies for Restructuring (This is not an all-inclusive list)

Skill Area	Independent	Not Independent
Activities that require thinking	<ul style="list-style-type: none"> Add the last step or two of work (e.g., spelling, math, physics, etc.) 	<ul style="list-style-type: none"> Use socially constructed methods Use a more structured approach (e.g., writing about the meaning of the text) Check the accuracy of the student's response Any time from many to several minutes together Use a more structured method (e.g., reading the student's work together and use a self-questioning or planning the use of the method)
One-to-one work (e.g., one-to-one work with other students)	<ul style="list-style-type: none"> Engage students in one-to-one work 	<ul style="list-style-type: none"> Use a more structured method (e.g., reading about the meaning of the text) Check the accuracy of the student's response Any time from many to several minutes together Use a more structured method (e.g., reading the student's work together and use a self-questioning or planning the use of the method)
Activities which are cognitively demanding	<ul style="list-style-type: none"> Provide the end of transition (e.g., by using a full set or a set of unstructured tasks) 	<ul style="list-style-type: none"> Use a more structured method (e.g., reading about the meaning of the text) Check the accuracy of the student's response Any time from many to several minutes together Use a more structured method (e.g., reading the student's work together and use a self-questioning or planning the use of the method)
Transitions to related activities (e.g., reading to writing)	<ul style="list-style-type: none"> Provide the end of transition (e.g., by using a full set or a set of unstructured tasks) 	<ul style="list-style-type: none"> Use a more structured method (e.g., reading about the meaning of the text) Check the accuracy of the student's response Any time from many to several minutes together Use a more structured method (e.g., reading the student's work together and use a self-questioning or planning the use of the method)
Complex tasks (e.g., reading to writing)	<ul style="list-style-type: none"> Provide the end of transition (e.g., by using a full set or a set of unstructured tasks) 	<ul style="list-style-type: none"> Use a more structured method (e.g., reading about the meaning of the text) Check the accuracy of the student's response Any time from many to several minutes together Use a more structured method (e.g., reading the student's work together and use a self-questioning or planning the use of the method)
